

Meet Your Curbio Team

The Curbio team is here for you from contract to closing.

Home Improvement Consultants

Your first point of contact is your Home Improvement Consultant, or HIC, who will reach out within 24 hours after you request your estimate. Curbio HICs are previous Realtors®, designers, and construction professionals who guide you and your sellers through the estimate and scoping process. Leaning on years of experience, they offer invaluable insight on which improvements and materials will help you achieve your desired results.

Project Managers

After the contract is signed, you'll be connected with your Project Manager, who will handle your project from start to finish. They'll source and manage a team of pre-vetted subcontractors and see to every detail of your project. Your Project Manager will share frequent updates via the Curbio Project Portal, so you're never left wondering what's happening on a project site.

Production & Design Team

Just like any movie, our work couldn't be done without the production crew behind the scenes. They take care of permits and ensure all the materials you choose are ordered on time, keeping projects on track for completion and you on track for closing. For large remodels, our design team will also provide renderings.
